PROJECT

\$ 7 MILLION
120,000 SQ FT

The 3M Company is an American multinational corporation that produces thousands of products including: adhesives, abrasives, laminates, medical and dental products, electronic materials, car-care products and optical films.

3M Edumex provides manufacturing services for thirteen 3M divisions and works with variety of products, among them, medical drapes, dental products, abrasive belts, furnace filters, vacuum filters, liquid cartridge filters, tapes, first aid dressings, paint replacement film, lint rollers, reflective tapes, polish pads and easel pads.

ECM International has provided project management for 3M Edumex in Juarez, Mexico since their first facility expansion in 1990. Services have been comprehensive starting with project specifications and design coordination thru the contractor bidding process, construction administration and building turnover.

So far, 3M Edumex and ECM have teamed for three facilities (40,000, 60,000 & 150,000 s.f).
