

# POWER TOOL MANUFACTURING FACILITY BOSCH

## CLIENT

ROBERT BOSCH CORPORATION

## LOCATION

CIUDAD JUAREZ, MEXICO

## ROLE

PROJECT MANAGEMENT

## PROJECT

125,000 SQ FT

Bosch is a German multinational automotive, appliance, power tool, electronics and engineering company and is one of the world's largest supplier of automotive components.

Bosch hired ECM International to manage the design and construction of a new manufacturing facility in Juarez, Mexico. Bosch manufactures numerous automotive products, from computers that control the engine operations to sensors that minimize possible impact in the event of a collision. Sophisticated airbag sensors, as well as other devices will be produced at this plant. These sensors will be supplied to Ford, Chrysler and Nissan.

ECM provided a full menu of project delivery services for Bosch for this program. Services began with design development consultation, moved to project specifications, then contractor solicitation and selection and then carried thru all aspects of construction thru building completion and delivery to client.

ECM offers a complete toolbox of knowledge, experience and wisdom to firms as they build new facilities.
