ROLE

PROGRAM MANAGEMENT

El Paso Electric Company (EPE) is a regional electric utility providing generation, transmission and distribution service to approximately 400,000 retail and wholesale customers in a 10,000 square mile area of Southern New Mexico and West Texas.

ECM currently manages 24 EPE capital projects. These projects include new substations, transmission lines and distribution facilities as well as upgrades to existing substation and transmission infrastructure.

ECM provides comprehensive project management services across all phases and disciplines of EPE projects to include land and right-of-way acquisition, regulatory compliance, engineering design, material procurement, construction and project closeout. Additionally, our professionals have extensive experience in integrating and coordinating efforts across the various functional departments inherent in a large electric utility to include engineering, procurement, budget and accounting, facilities, land management, legal, government affairs, environmental and public relations.
