

FORT BLISS - TRANSFORMATION PROGRAM WHITE SANDS MISSILE RANGE

CLIENT

U.S. GOVERNMENT
FORT BLISS

LOCATION

WHITE SANDS MISSILE RANGE

ROLE

PROJECT MANAGEMENT

PROJECT

\$ 100 MILLION

ECM has successfully managed a wide-range of Federal Government work including multiple projects in 2007 - 2011 at White Sands Missile Range and Fort Bliss Army Base; the two largest military facilities in the United States.

As a consultant to the Land Development Engineer (LDE) for the \$5.6 billion Ft. Bliss transformation, ECM engineers and inspectors worked on over \$100 million on projects at the nearby White Sands Missile Range. ECM's had many diverse assignments including; Radiographic Test Facility, Zumwalt Batt Track Observation Tower, Upgrade Fuel Station, Repair War Road Phase II, Directorate of Emergency Services Building, T-4 Instrumentation Facility, and the Salinas Peak Tower Replacement.

ECMs' duties included a complete variety of oversight activities from project planning (programming, constructability reviews etc.) to direct and comprehensive construction inspections. Also, safety and regulatory compliance as well as administration of the Army Resident Management System and detailed financial reporting.
