ROLE

PROJECT MANAGEMENT

PROJECT

\$7.3 MILLION
38,600 SF

The Valle Verde Transportation Training Center houses a variety of transportation workforce programs. The facility supports the instruction and hands-on training of students involved in Diesel Mechanics, Automotive Technology, Auto Body/Collision, and Hydraulic Technology.

Primary training spaces include active bays for automotive technology, hydraulic technology, diesel mechanic and auto body/collision and are fully loaded with critical gear like high-tech equipment and machinery, overhead trolley crane and vehicle-size paint booth. The facility also offers classrooms, hydraulic support rooms, computer lab, tool crib & tool box rooms, conference room, private offices, break rooms, restrooms, storage, & utility room as well as state-of-the-art IT, AV, and security installation.

ECM's comprehensive Program Management services included: budget planning and management, coordination and analysis of existing facilities study, architect selection and management from detailed programming through the release of construction documents, proposal and contract management, and the formalization and establishment of District-wide standards, as well as full-time Construction Management from groundbreaking to move-in.
